- Material UI/Git

ABOUT ME

I'm a front-end developer with experience creating SPA, using React, Redux, TypeScript, JavaScript, HTML, CSS. I chose front-end development because I like to visually see the result of my work. But in the future, I want to learn back-end and become a full stack developer.

WORK EXPERIENCE

FRONT-END DEVELOPER:

- Main responsibilities:
- React development using redux, reactredux, react-router-dom, redux-thunk, axios, material UI libraries.
  - work with Hooks, TypeScript.
  - refactoring, bug fixing, registration and login form creation.
  - reusable components development.

DESIGN ENGINEER in construction sphere:

- Worked for 5 companies in construction field and took part in the development of industrial and civil construction projects.
- Main responsibilities were:
- development of design documentation;
  - understanding and reading of design documentation;
  - knowledge of specialized software;
  - ability to use regulatory documentation
